

# Redland CPD Community

## Come and Join Us!

With 2012 upon us, Redland Business Solutions has formed a community to bring together representation, from all aspects of the financial services industry, affected by the new RDR regulations.

At Redland we have a reputation for developing leading solutions and services we feel would be of benefit to the industry and with RDR regulation just around the corner, we are very conscious that there are still many areas that are unclear or that there are differences in the initial interpretation being developed.

To this end, we at Redland are bringing the industry together in this online community to meet these challenges head on and discuss the outstanding issues, with the objective of canvassing opinion and achieving significant consensus on the best way forward. This community is also committed to informing a wider audience of the consensus reached, any emerging standards and specific challenges being addressed by sectors of the industry.

The aim of the community is to provide some clarity on;

- [Interpreting the Regulations](#)
- [Formulating the Processes](#)
- [Developing Solutions](#)

This will cover CPD Planning and Recording, CPD solutions and SPS Management – submission, issue and checking.

As community members, you will combine expertise and experience from many influential and knowledgeable industry organisations, professional bodies, distribution firms, compliance services suppliers and accredited bodies.
